Portfolio: https://rohitsutharportfolio2.netlify.app/

PROFESSIONAL SUMMARY

Junior Data Engineer with hands-on experience building **batch ETL** and **real-time streaming** pipelines using Python, SQL, PySpark and Kafka. Built an end-to-end Bronze-Silver-Gold (medallion) pipeline with data quality checks, revenue reconciliation and GitHub Actions automation, plus a Kafka + Spark Structured Streaming transaction monitor. Practical experience in data cleaning, transformation and pipeline reliability. Databricks certified. Strong foundation in Python, SQL, DBMS and Java.

TECHNICAL SKILLS

Languages: Python, SQL, Java

Data Engineering: ETL/ELT, Batch & Streaming Pipelines, Medallion Architecture, Data Quality Checks, Reconciliation

Big Data: PySpark, Spark Structured Streaming, Apache Kafka, Databricks, Delta Lake, Parquet, Basics of Hadoop

Cloud & Orchestration: Azure Data Factory, Azure Blob Storage, Azure SQL, AWS Basics, GitHub Actions

Databases/Tools: PostgreSQL, MySQL, DuckDB, Git, GitHub, Docker, pytest, Excel/CSV

Concepts: DBMS, Joins, CTEs, Aggregations, Window Functions, Partitioning, Event-Time Windows, Watermarking

PROJECTS

E-commerce Analytics Pipeline | Olist Dataset

Tech: Python, PySpark, SQL, DuckDB, Parquet, GitHub Actions, GitHub Pages

GitHub: https://github.com/9929-90/E-commerce-Analytics-Pipeline

Live Dashboard: https://9929-90.github.io/E-commerce-Analytics-Pipeline/

- Built an end-to-end **batch ETL** pipeline on **Bronze-Silver-Gold** architecture, turning raw e-commerce data into analytics-ready Parquet datasets.
- Developed PySpark cleaning and standardization jobs; created Gold-layer datasets for daily sales and product performance.
- Implemented data quality checks and revenue reconciliation with a **R$0.00** difference in a verified run.
- Analyzed **96,478** delivered orders and **32,951** products (**R$15.42M** revenue); automated runs with **GitHub Actions** and deployed a live dashboard on GitHub Pages.

UPI Transaction Monitor | Real-Time Streaming Analytics

Tech: Python, Apache Kafka, PySpark Structured Streaming, Parquet, Docker, pytest, HTML/JavaScript

GitHub: https://github.com/9929-90/UPI-Transactions-Monitor

- Built a **real-time pipeline** ingesting synthetic UPI events via **Kafka** (3-partition topic, Docker) and processing them with **PySpark Structured Streaming** into Parquet.
- Implemented transaction validation with a **quarantine** path for invalid records and routed high-value transactions (INR 50,000+) to a separate dataset.
- Detected suspicious activity using **event-time sliding windows** (1-min window, 10-sec slide) with **watermarking** and checkpointed state.
- Exposed live metrics through a Python API and HTML dashboard; wrote **32 automated pytest tests** covering validation and pipeline rules.

WORK EXPERIENCE

AI/ML Engineer Intern - PAPASIDDHI Technologies

May 2026 - Nov 2026 | Udaipur, Rajasthan

- Built Python data ingestion, cleaning and transformation pipelines to prepare conversational datasets for a voice-based **RAG** AI system.
- Designed retrieval and context-management workflows using SQL and structured data processing to store, query and optimize application data.
- Practiced **PySpark** and **Databricks** (DataFrames, Spark SQL, notebooks) for cleaning, joins and aggregations; explored partitioning, lazy evaluation, **Delta Lake** and Parquet.
- Improved data quality, pipeline reliability and response accuracy through systematic testing and debugging.

Web Support Executive - FBSPL

Jun 2025 - May 2026 | Udaipur, Rajasthan

- Cleaned, filtered and organized thousands of prospect records in CSV/Excel using **Python** scripts, improving data accuracy and usability.
- Built Python/AI automation to replace repetitive manual data tasks; monitored live production systems and resolved issues through root-cause analysis.
- Handled client queries and escalations, translating requirements into timely fixes.

CERTIFICATIONS

Databricks Certification - Databricks

EDUCATION

BSc Computer Science - MLSU, Udaipur

Graduation: 2025
